| Other Measurements | 25 |
| Minimum Contribution | 26 |

At the request of the plan sponsor, this report summarizes the Village of Morton Police Pension Fund as of May 1, 2020 . The purpose of this report is to communicate the following results of the valuation:

- Funded Status;
- Recommended Village Contribution;
- Statutory Minimum Contribution;

This report has been prepared in accordance with the applicable Federal and State laws. Consequently, it may not be appropriate for other purposes. Please contact Nyhart prior to disclosing this report to any other party or relying on its content for any purpose other than that explained above. Failure to do so may result in misrepresentation or misinterpretation of this report.

The results in this report were prepared using information provided to us by other parties. The census information has been provided to us by the employer. Asset information has been provided to us by the administrator. We have reviewed the provided data for reasonableness when compared to prior information provided, but have not audited the data. Where relevant data may be missing, we have made assumptions we believe to be reasonable. We are not aware of any significant issues with and have relied on the data provided. Any errors in the data provided may result in a different result than those provided in this report. A summary of the data used in the valuation is included in this report.

The actuarial assumptions and methods were chosen by the employer. In our opinion, all actuarial assumptions and methods are individually reasonable and in combination represent our best estimate of anticipated experience of the plan. Future actuarial measurements may differ significantly from the current measurements presented in this report due to such factors as the following:

- plan experience differing from that anticipated by the economic or demographic assumptions;
- changes in economic or demographic assumptions;
- increases or decreases expected as part of the natural operation of the methodology used for these measurements (such as the end of an amortization period); and
- changes in plan provisions or applicable law.

We did not perform an analysis of the potential range of future measurements due to the limited scope of our engagement. This report has been prepared in accordance with generally accepted actuarial principles and practice.

Neither Nyhart nor any of its employees have any relationship with the plan or its sponsor which could impair or appear to impair the objectivity of this report. To the extent that this report or any attachment concerns tax matters, it is not intended to be used and cannot be used by a taxpayer for the purpose of avoiding penalties that may be imposed by law.

The undersigned are compliant with the continuing education requirements of the Qualification Standards for Actuaries Issuing Statements of Actuarial Opinion in the United States and are available for any questions.

Date

Summary Results

The actuarial valuation's primary purpose is to produce a scorecard measure displaying the funding progress of the plan toward the ultimate goal of paying benefits at retirement. The Accrued Liability is based on the Projected Unit Credit actuarial cost method.

| | May 1, 2019 | May 1, 2020 |
|--|---------------|---------------|
| Funded Status Measures | | |
| Accrued Liability | \$ 19,694,228 | \$ 20,973,980 |

Changes since Prior Valuation and Key Notes

The Tier II benefit changes effective January 1, 2020 under Illinois Public Act 101-610 are included in the valuation. The changes result in an increase in benefit obligations and an increase in the recommended contribution.

The mortality improvement scale was updated from scale MP-2018 to scale MP-2019. The change results in a decrease in benefit obligations and a decrease in the recommended contribution.

Identification of Risks

The results presented in this report are shown as single point values. However, these values are derived using assumptions about future markets and demographic behavior. If actual experience deviates from our assumptions, the actual results for the plan will consequently deviate from those presented in this report. Therefore, it is critical to understand the risks facing this pension plan. The following table shows the risks we believe are most relevant to the Village of Morton Police Pension Fund. The risks are generally ordered with those we believe to have the most significance at the top. Also shown are possible methods by which a more detailed assessment of the risk can be performed.

Type of Risk

Method to Assess Risk

| | |
|-----------------------|---|
| Investment Return | Scenario Testing; Asset Liability Study |
| Participant Longevity | Projections and Contribution Strategy |
| Early Retirement | |
| Salary Growth | |
| | |

Plan Maturity Measures - May 1, 2020

Each pension plan has a distinct life-cycle. New plans promise future benefits to active employees and then accumulate assets to pre-fund those benefits. As the plan matures, benefits are paid and the pre-funded assets begin to decumulate until ultimately, the plan pays out all benefits. A plan's maturity has a dramatic influence on how risks should be viewed. The following maturity measures illustrate where the Village of Morton Police Pension Fund falls in its life-cycle.

Duration of Liabilities: 18.6

Duration is the most common measure of plan maturity. It is defined as the sensitivity of the liabilities to a change in the interest rate assumption. The metric also approximates the weighted average length of time, in years, until benefits are expected to be paid. A plan with high duration is, by definition, more sensitive to changes in interest rates. A plan with low duration is more susceptible to risk if asset performance deviates from expectations as there would be less time to make up for market losses in adverse market environments while more favorable environments could result in trapped surplus from gains. Conversely, high duration plans can often take on more risk when investing, and low duration plans are less sensitive to interest rate fluctuations.

Demographic Distribution - Ratio of Actively Accruing Participants to All Participants: 58.8%

A plan with a high ratio is more sensitive to fluctuations in salary (if a salary-based plan) and statutory changes. A plan with a low ratio is at higher risk from demographic experience. Such a plan should pay close attention to valuation assumptions as there will be less opportunity to realize future offsetting gains or losses when current experience deviates from assumptions. Plans with a low ratio also have limited opportunities to make alterations to plan design to affect future funded status.

Asset Leverage - Ratio of Payroll for Plan Participants to Market Value of Assets: 11.2%

Younger plans typically have a large payroll base from which to draw in order to fund the plan while mature plans often have a large pool of assets dedicated to providing benefits to a population primarily consisting of members no longer on payroll. Plans with low asset leverage will find it more difficult to address underfunding, as the contributions needed to make up the deficit will represent a higher percentage of payroll than for a plan with high asset leverage.

Benefit Payment Percentage - Ratio of Annual Benefit Payments to Market Value of Assets: 5.6%

As a plan enters its decumulation phase, a larger percentage of the pre-funded assets are paid out each year to retirees. A high percentage is not cause for alarm as long as the plan is nearly fully funded. However, such a plan is more sensitive to negative asset performance, especially if cash contributions are not an option to make up for losses.

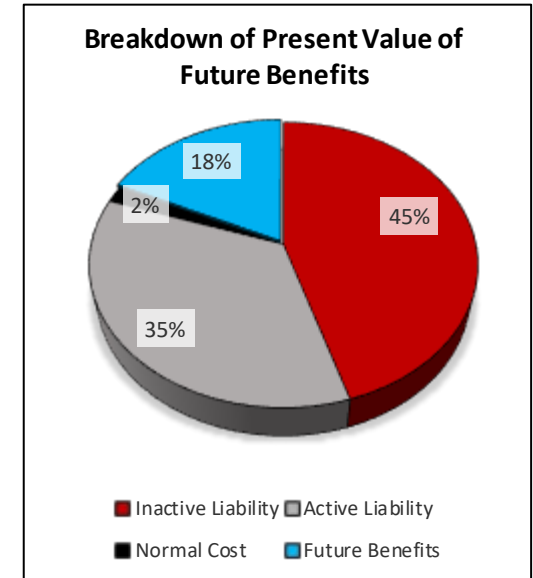

Present Value of Future Benefits

The Present Value of Future Benefits represents the future benefits payable to the existing participants.

May 1, 2020

Present Value of Future Benefits

| | |
|--|---------------|
| Active Participants | |
| Retirement | \$ 12,696,018 |
| Disability | 930,577 |
| Death | 266,386 |
| Termination | 440,730 |
| Total Active | \$ 14,333,711 |
| Inactive participants | |
| Retired Participants | \$ 10,768,327 |
| Beneficiaries | 249,121 |
| Disabled Participants | 788,330 |
| Terminated Vested Participants | - |
| Total Inactive | \$ 11,805,778 |
| Total | \$ 26,139,489 |
| Present Value of Future Payrolls | \$ 16,975,136 |
| Present Value of Future Employee Contributions | \$ 1,682,235 |

Accrued Liability

The Funding Liability measures the present value of benefits earned as of the valuation date, using the actuarial assumptions described in the assumption section of this report and the Projected Unit Credit actuarial cost method.

May 1, 2020

Funding Liabilities

| | |
|--------------------------------|----------------------|
| Active Participants | |
| Retirement | \$ 8,039,762 |

| Disabled Participants | 788,330 |
| Terminated Vested Participants | - |
| Total Inactive | \$ 11,805,778 |
| Total | \$ 20,973,980 |
| | |
| Normal Cost | \$ 478,079 |

Asset Information

The amount of assets backing the pension promise is the most significant driver of volatility and future costs within a pension plan. The investment performance of the assets directly offsets the ultimate cost.

| | May 1, 2020 |
|---|---------------|
| Market Value Reconciliation | |
| Market Value of Assets, Beginning of Prior Year | \$ 13,909,941 |
| Contributions | |

Reconciliation of Gain/Loss

May 1, 2020

Liability (Gain)/Loss

| | |
|---|---------------|
| Actuarial Liability, Beginning of Prior Year | \$ 19,694,228 |
| Normal Cost | 515,093 |
| Benefit Payments | (733,759) |
| Expected Interest | 1,190,546 |
| Expected Actuarial Liability, Beginning of Current Year | \$ 20,666,108 |
| Actual Actuarial Liability, Before Changes | \$ 21,011,255 |
| Liability (Gain)/Loss | \$ 345,147 |

Asset (Gain)/Loss

| | |
|---|---------------|
| Actuarial Value of Assets, Beginning of Prior Year | \$ 13,906,423 |
| Contributions | 1,054,524 |
| Benefit Payments and Administrative Expenses | (745,161) |
| Expected Return | 843,666 |
| Expected Actuarial Value of Assets, Beginning of Current Year | \$ 15,059,452 |
| Actual Actuarial Value of Assets, Beginning of Current Year | \$ 14,820,558 |
| Asset (Gain)/Loss | \$ 238,894 |

Total (Gain)/Loss

\$ 584,041

Development of Recommended Contribution

The recommended contribution is the annual amount needed to fund the plan to 100% by the end of the 2040 fiscal year as a level percentage of payroll, using the Projected Unit Credit actuarial cost method. The recommended contribution is subject to the State statutory minimum, which is the annual amount needed to fund the plan to 90% by the end of the 2040 fiscal year as a level percentage of payroll, using the Projected Unit Credit actuarial cost method.

May 1, 2020

Funded Position

| | |
|--|---------------|
| 1. Projected Unit Credit Accrued Liability | \$ 20,973,980 |
| 2. 90% of Projected Unit Credit Accrued Liability | \$ 20,973,980 |
| 3. Actuarial Value of Assets | 14,820,558 |
| 4. Unfunded Actuarial Accrued Liability (UAAL) (2 – 3) | \$ 6,153,422 |

Recommended Contribution

| | |
|--|------------|
| 1. Normal Cost | \$ 478,079 |
| 2. Administrative Expenses | 11,402 |
| 3. Amortization of UAAL | 382,344 |
| 4. Applicable Interest | 26,155 |
| 5. Total Recommended Contribution | \$ 897,980 |
| 6. Expected Employee Contributions | 163,945 |
| 7. Net Recommended Village Contribution (5 – 6) | \$ 734,035 |
| 8. Minimum Contribution (Public Act 096-1495 Tax Levy Requirement) | \$ 599,803 |
| 9. Final Contribution [max (7,8)] | \$ 734,035 |
| As a Percentage of Expected Payroll | 45.7% |

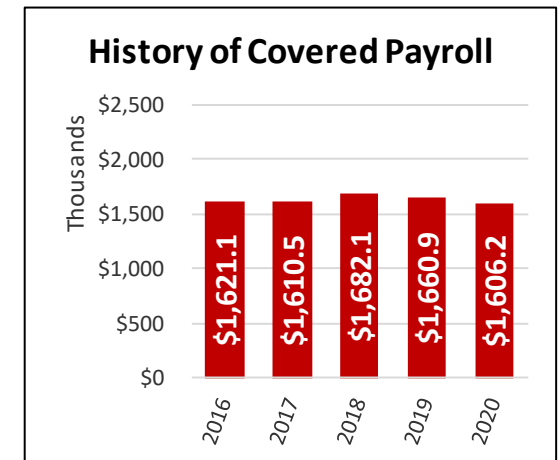

The Plan's Normal Cost plus interest on the Unfunded Actuarial Accrued Liability is \$ 686,649 .

A contribution greater than the Normal Cost plus interest on the Unfunded Actuarial Accrued Liability will reduce the Unfunded Actuarial Accrued Liability, if all other assumptions are met. A contribution less than the Normal Cost plus interest on the Unfunded Actuarial Accrued Liability will increase the Unfunded Actuarial Accrued Liability, if all other assumptions are met. Consider making a contribution greater than the Normal Cost plus interest on the Unfunded Actuarial Accrued Liability in order to pay down the Plan's shortfall more rapidly if that amount is greater than your funding policy contribution.

Demographic Information

The foundation of a reliable actuarial report is the participant information provided by the plan sponsor. Monitoring trends in demographic information is crucial for long-term pension planning.

Eligibility for Participation

Police Officers of the Village of Morton

Accrual of Benefits

For employees hired prior to January 1, 2011, the normal retirement benefit is equal to 50% of the final salary plus 2.5% of any service over 20 years (with a maximum of 30) times the final salary. There is a minimum benefit of \$1,000 per month. The benefit is paid as a 100% joint and survivor benefit with the spouse, children under 18, or dependent parents of the participants as the survivor.

For employees hired after or on January 1, 2011, the normal retirement benefit is equal to 2.5% of the final average salary times benefit service (maximum 30 years.) The benefit is paid as a 66.67% joint and survivor benefit with the spouse, children under 18, or dependent parents of the participants as the survivor.

Benefits

Normal Retirement

| | |
|-------------|---|
| Eligibility | For employees hired prior to January 1, 2011, the normal retirement date is the first day of the month on or after completion of 20 years of service and attainment of age 50. For employees hired after or on January 1, 2011, the normal retirement date is the first day of the month on or after completion of 10 years of service and attainment of age 55. |
| Benefit | Unreduced Accrued Benefit payable immediately. |

Early Retirement

| | |
|-------------|--|
| Eligibility | For employees hired prior to January 1, 2011 and terminating with less than 20 years of service For employees hired after or on January 1, 2011 who has attained age 50 and has 10 years of service. |
| Benefit | For those hired prior to January 1, 2011 the Accrued Benefit of 2.5% of final salary times service shall be paid at age 60. For those hired after or on January 1, 2011 the Accrued Benefit is reduced by 0.5% for each month prior to age 55 |

Termination

| | |
|-------------|--|
| Eligibility | Participants terminating before 20 years of service. |
| Benefit | Refund of Contributions |

Disability In The Line of Duty

| | |
|-------------|---|
| Eligibility | For participants who become disabled in the line of duty. |
| Benefit | The greater of 65% of the final salary or the accrued benefit |

Disability Not In The Line of Duty

| | |
|-------------|---|
| Eligibility | For participants who become disabled outside of the line of duty. |
| Benefit | 50% of the final salary |

Death In the Line of Duty

| | |
|-------------|---|
| Eligibility | For participants who die in the line of duty. |
| Benefit | The benefit is 100% of final salary paid to the survivor. |

Death Not In the Line of Duty

| | |
|-------------|--|
| Eligibility | For participants who die outside of the line of duty. |
| Benefit | For those hired before 1/1/2011 with greater than 20 years of service, a benefit of 100% of the accrued benefit is paid to the survivor. For those with more than 10 years of service, but less than 20 years of service, a benefit of 50% of the final salary is paid to the survivor. For those hired after 1/1/2011, a benefit equal to the greater of 54% of Final Salary and 66-2/3% of the accrued benefit is paid to the survivor. |

Compensation

Final Salary is the salary attached to the rank held on the last day of service, or one year prior to the last day, whichever is greater.

Final Average Salary is the average monthly salary obtained by dividing the total salary of the police officer during the 48 consecutive months of service within the last 60 months of service in which the total salary was the highest by the number of months of service in that period. Salary will not exceed \$106,800 adjusted from January 1, 2011 with the lesser of 3% and 100% of the CPI on November 1.

Credited Service

For Vesting and Benefit Accrual purposes, pension service credit is based on elapsed time from hire.

Employee Contributions

9.91% of Compensation

COLA

Eligibility All Participants

Benefit For employees hired prior to January 1, 2011 a compound COLA of 3% is granted each year after attainment of age 55 and 1 year of payments.

For employees hired after or on January 1, 2011 a simple COLA of the lesser of 3% and 50% of the CPI on November 1 is granted each year after attainment of age 60 and 1 year of payments.

For disabled employees, a simple COLA is available after attainment of age 60 and 1 year of payments. For employees hired prior to January 1, 2011 the COLA is 3%. For employees hired after January 1, 2011, the COLA is the lesser of 3% and 50% of the CPI on November 1.

Plan Provisions Not Included

We are not aware of any plan provisions not included in the valuation

Adjustments Made for Subsequent Events

We are not aware of any event following the measurement date and prior to the date of this report that would materially impact the results of this report.

Except where otherwise indicated, the following assumptions were selected by the plan sponsor with the concurrence of the actuary. Prescribed assumptions are based on the requirements of the relevant law and applicable regulations. The actuary was not able to evaluate the prescribed assumptions for reasonableness for the purpose of the measurement.

| | |
|--|---|
| Valuation Date | May 1, 2020 |
| Participant and Asset Information Collected as of | May 1, 2020 |
| Actuarial Cost Method (CO) | Projected Unit Credit Cost Method |
| Amortization Method – Recommended Contribution (CO) | Closed level percentage of payroll amortization of 100% of the Unfunded Actuarial Accrued Liability using a 3.50% payroll growth assumption over the period ending on April 30, 2041 (20-year amortization in 2020) |
| Asset Method | 5-year smoothing of asset gains and losses |
| Interest Rates (CO) | 6.00%, net of investment expenses |
| Inflation (FE) | 2.50% |
| Annual Pay Increases (FE) | 4.00% |
| Ad-hoc Cost-of-living Increases | 3.0% (1.25% for those hired after 1/1/2011) |
| Mortality Rates (FE) | |
| Healthy | RP-2014 Mortality Table with blue collar adjustment, projected generationally from 2013 using Scale MP-2019 |
| Disabled | 115% of the healthy mortality table, projected generationally from 2013 using Scale MP-2019 10% of deaths are assumed to be in the line of duty |

Retirement Rates (FE)

Recommended rates from the 2017 IDOI experience study:

| Tier I | | Tier II | |
|--------|------|---------|------|
| Age | Rate | Age | Rate |
| 50-51 | 15% | 50-54 | 5% |
| 52-54 | 20% | 55 | 40% |
| 55-64 | 25% | 56-64 | 25% |
| 65-69 | 40% | 65-69 | 40% |
| 70+ | 100% | 70+ | 100% |

Disability Rates (FE)

Recommended rates from the 2017 IDOI experience study. Sample rates include:

| Age | Rate |
|-----|--------|
| 20 | 0.000% |
| 30 | 0.140% |
| 40 | 0.420% |
| 50 | 0.710% |

60% of disabilities are assumed to be in the line of duty

Termination Rates (FE)

Recommended rates from the 2017 IDOI experience study. Sample rates include:

| Age | Rate |
|-----|--------|
| 20 | 10.40% |
| 30 | 5.60% |
| 40 | 1.90% |
| 50 | 1.50% |

Marital Status and Ages (FE)

80% of participants are assumed to be married with female spouses 3 years younger.

Expense Load

Equal to the administrative expenses paid in the prior year.

Funding Policy

Normal cost, plus an amortization of the unfunded liability as a level percent of payroll to attain 100% funding in fiscal 2040 using the Projected Unit Credit Cost Method

FE indicates an assumption representing an estimate of future experience

MD indicates an assumption representing observations of estimates inherent in market data

CO indicates as assumption representing a combination of an estimate of future experience and observations of market data

The actuarial report also shows the necessary items required for plan reporting and the any state requirements.
